WORKSHEET

NATURAL RESOURCES SORT

Instructions: Provide each student with a copy of this worksheet. Ask students to cut out each box on the worksheet and then glue the title boxes (renewable resources and non-renewable resources) to the top of a piece of construction paper. Students will then glue the remaining boxes to the paper under which type of resource they are.

Extension: Have students fold their construction paper in half and write the definition of renewable and non-renewable resources on the back.
